

Life Tech Lab

remote

„LifeTechLab was the perfect preparation for building our own life-science startup. It trained us to explain our idea clearly and helped to answer crucial business questions. We connected with other founders and above all had a lot of fun.“

Dr. Jonas Schubert, DermaPurge
participant of class 02/19

Starting up in life sciences with LifeTechLab remote by dresden|exists

With the start-up incubation program LifeTechLab scientists and students get the opportunity to turn their life-science discovery or business idea into a solid business model.

In addition to general challenges that every start-up faces such as limited resources and many decisions, the field of life sciences requires unique market and income-cost considerations as well as a clear understanding of intellectual property (IP) rights and regulations.

Why LifeTechLab?

1. Get an overall understanding of the startup process.
2. Sharpen your idea and know where to start.
3. Understand the needs of your future customers.
4. Get guidance on regulations, IP protection and specific income models for life science startups.
5. Connect with other teams, founders, experts, lawyers and business people.
6. Learn how to pitch and get lots of opportunity to practice.
7. Grow together as a team.
8. Build confidence that you can do it.

So with LifeTechLab you will do first things first, avoid pitfalls and learn from experts, successful entrepreneurs, and each other.

How does LifeTechLab work?

Apply by September 30, 2021: Please use the application form at www.dresden-exists.de/lifetechlab. Don't worry if your idea is vague. Converting it into a business model is the purpose of LifeTechLab.

Be part of class 01/2021: 4 months, 6 teams, online workshops and individual coaching

Events and workshop topics:

- October 12: Kick-off
- October 28 and 29: Development of your first business model
- November 11: Intellectual property protection
- November 24: Cooperation contracts
- December 9: Mid-term presentations
- January 6: Financial planning
- January 18: Founder's corner
- January 26: Pitch training
- February 15: Final pitch day
- February 17: Pitch day review & roadmap

To ensure progress of your idea, continuous attendance is required.

What happens after LifeTechLab?
