Starting up in life sciences

with LifeTechLab by TUD|excite

With the start-up incubation program LifeTechLab scientists and students get the opportunity to turn their life-science discovery or business idea into a solid business model.

In addition to general challenges that every start-up faces such as limited resources and many decisions, the field of life sciences requires unique market and income-cost considerations as well as a clear understanding of intellectual property (IP) rights and regulations.

Why LifeTechLab?

1. Get an overall understanding of the startup process.
2. Sharpen your idea and know where to start.
3. Understand the needs of your future customers.
4. Get guidance on regulations, IP protection and specific income models for life science startups.
5. Connect with other teams, founders, experts, lawyers and business people.
6. Learn how to pitch and get lots of opportunity to practice.
7. Grow together as a team.
8. Build confidence that you can do it.

So with LifeTechLab you will do first things first, avoid pitfalls and learn from experts, successful entrepreneurs, and each other.

Apply by
October 31, 2024!

How does LifeTechLab work?

Apply by October 31, 2024:

Please use the application form on our website:

<https://www.dresden-exists.de/beratung/lifetechlab/>
